

Quakesafe Building Solutions

Fact Sheet 2011

Safety:

Installing a QSBS Chimney will increase safety for you and your family in and around the home
How?..... By dramatically reducing the weight of the chimney on your home.
For example.... a 2000kg chimney reduces in weight to approx 60kg.
QSBS Chimneys are Light, Safe and Quakeproof.

Waterproof:

QSBS Chimneys are made using a one piece 'monocoque' fibreglass chimney-shaped box. They will not leak and comply with the building code acceptable solution E2/AS1.

Durable:

The once piece fibreglass chimney box is incredibly tough. Think about all the boats moored at marinas around New Zealand. Some for more than 30 years. Fibreglass is well proven to be tough and very durable.

Authentic Looking:

Our patent applied for technology is used to ensure as near as possible authentic look and colouring. Our chimneys aren't shiny or reflective. They look real even from touching distance.
They will add historic, visual and \$ value to your home.

Warranty:

20 years material warranty.

Fully Engineered:

QSBS Chimney Solutions are fully engineered to maximum wind and earthquake loadings. They comply with Building code classes NZS 3604, NZS 1170, B1/AS1, B1/AS2, B2/AS1, E2/AS1, AS/NZS 2918.

EQR Approved:

Fletchers EQR/chch recommend the QSBS range of chimneys as an excellent solution for replacement of earthquake damaged or dangerous Chimneys.

Quakesafe Building Solutions

Custom Built Chimney Options:

QSBS offer a fully customised/ bespoke chimney option. We can design and build to suit any building or home. Old, Heritage, Modern or Eccentric.

Easy Maintenance:

QSBS chimneys are easy for tradesman and DIY's to maintain and/or remove for future roof and flue repairs.

Will not Rust or Rot:

Made with Fibreglass [FRP] and brick veneer.
